## SUMMARY

Skilled computer science student with five years of experience with strong proficiency in Java, C#, JavaScript, and database management tools. Seeking full time or internship position where I can use my skills to enhance software development, web application projects, analyze problems, and accomplish business needs.

## EDUCATION

Kennesaw State University - Kennesaw, GA
Bachelor of Science, Computer Science
Expected Graduation May 2020

## ACADEMIC PROJECTS

Senior Project: Shaw Industries Meeting Room Kiosk
*Group Research Project: 08/2019 - 12/2019*
Project Goal: Create a conference room kiosk that integrates with their current Google Suite platform and provides analytics on room utilization through machine learning.
**Responsibilities:**
- Create a website user interface through a combination of CSS/HTML, JavaScript, and jQuery.
- Generate all methods for Google API integration to obtain event information on shared calendar resources within the G-Suite platform.
- Assist in the development of a machine learning model to detect room occupants using OpenCV and Python.

## SKILLS

Programming Languages: Java, C#, C++, JavaScript, and Python
Database Management: Microsoft Excel, Microsoft Access, SQL Server, and SQLite.
Frameworks and Technologies: .NET, SQL, jQuery, Angular, CSS, HTML.
OS Platforms: Windows and Linux
Methodologies: Agile development
Cloud Platform Experience in AWS and GCP

## WORK EXPERIENCE

**Amazon Warehouse Associate – January 2016 – Present**
*Chattanooga, TN*
Amazon outbound problem solver associate
- Work in a team environment with fellow problem solvers that research problem shipments through an Amazon shipment database across all outbound functions including Pick, Pack, Sort, and Ship dock.
- Investigate lost items in the Amazon shipment database.
- Troubleshoot and reduce problem shipments to minimize issues and increase workflow.
- Collaborate with management and fellow problem solvers to ensure customer's orders are being fulfilled.

Amazon outbound pick associate / Seasonal Ambassador
- Process different merchandise in a warehouse environment using an RF scanner.
- Trained over 50 new associates for the pick direct function for 2 consecutive years as a seasonal ambassador while supervising and communicating with them on preventative barriers for their job.
- Assist in maintaining a safe work environment by eliminating hazardous conditions such as properly storing equipment, reporting liquid damages, and disposing of cardboard/plastics.

**Wendy's Employee/Shift Manager – September 2011 - January 2016**
*Dalton, GA*
- Generated and organized sales and inventory reports within Microsoft Excel.
- Communicated well and used interpersonal skills to make positive relationships with guests and employees.
- Organized and scheduled employees for day to day functions within the workplace.
